

REMARKS / ARGUMENTS

The applicants are submitting herewith a Terminal Disclaimer to deal with the obviousness type double patenting objection relating to claims 1 to 33.

In claims 34 and 36 the applicants have specified that a spacing agent is present. Support for this feature is found in the paragraph commencing at line 25, page 10, and a newly-added Example 4 in the continuation-in-part application. It is believed this amendment overcomes the statutory double-patenting objection since this feature is not present in the claims of the '224 patent.

It is believed that with these amendments the application is now in condition for allowance.

Reconsideration and allowance are therefore respectfully solicited.

Respectfully submitted,

Richard J. Mitchell
